## Pipe-shape Air-termination Rods

Light type with less transport weight due to less material used.

With its special aluminium alloy, the pipe provides the same performance at wind loads like conventional air-termination rods. This resistance of the pipe allows for installation with wedged concrete base without causing deformations.

Total length	Reduced length	Material	Diameter Ø	Qty./Pack.	Part No.	Ordering quantity
--------------	----------------	----------	------------	------------	----------	-------------------

### A model

Chamfered, for wedged concrete bases from a length of 2.5 m, with additional fixing device, e.g. DEHNiso distance holder

1500 mm	1000 mm	AlMgSi	16/10 mm	10	103 410	.....
2000 mm	1000 mm	AlMgSi	16/10 mm	10	103 420	.....
2500 mm	1000 mm	AlMgSi	16/10 mm	10	103 430	.....
3000 mm	1000 mm	AlMgSi	16/10 mm	10	103 440	.....

### B model

Chamfered with special lengths

3500 mm	1000 mm	AlMgSi	16/10 mm	10	103 450	.....
4000 mm	1000 mm	AlMgSi	16/10 mm	10	103 460	.....
5000 mm	1000 mm	AlMgSi	16/10 mm	10	103 480	.....

## Concrete Base with adapted Base Plate

Complete unit for easy installation.

Weight	Material	Diameter Ø	Qty./Pack.	Part No.	Ordering quantity
--------	----------	------------	------------	----------	-------------------

### C model

Wedged unit and with adapted base plate, stackable, wedge made of stainless steel (StSt) (V2A)

17 kg	concrete (B55)	337 mm	54	102 340	.....
-------	----------------	--------	----	---------	-------

For large quantities a further discount can be granted
